GET OEM & AFTERMARKET SCANNING, CALIBRATION, PROGRAMMING & LIVE EXPERT SUPPORT

GET EVERYTHING YOU NEED ON ONE SCREEN!

DriveSafe with IVSTrio™ is the ultimate collision diagnostics tool!

IVSTrio includes:

IVSTrue-OE™ – Authentic OE Scans and OE Scan reports run by Opus IVS expert technicians using OEM-lic + -ensed software

IVSQuickScan™ – Fast aftermarket vehicle scan delivering results in 2 to 4 minutes

IVSRepair™ – Full aftermarket multi-brand diagnostic software with live data, bi-directional controls, system tests and ADAS calibration functions

Plus, IVS Remote Services:

IVS 360™ – Live repair guidance from 100+ OE-trained Master Technicians who can remote directly into the vehicle

IVSRAP™ – Remote ECU programming and ADAS calibrations performed by IVS 360 Master Technicians
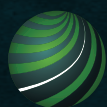

PLUS, DRIVESAFE™ INCLUDES ACCESS TO WORKFLOW EFFICIENCY TOOLS:

NEW IVSWizard™ – Pre-configured decision tree designed by industry-leading collision shops to help technicians select between an OE scan or QuickScan™ for each repair based on recommendations that are customizable

NEW IVSMap™ Powered by ADAS Checklist – Includes a list of ADAS systems on the vehicle, identifies calibration requirements, targets needed by system and ALLDATA service information for each DTC present

CCC ONE® Estimating Software – CCC ONE® installed directly on the DriveSafe with built-in camera allows you to prepare estimates directly from the platform

CCC ONE® Data Integration – Save time per repair with a direct integration into the leading estimation software. Scan reports and invoices feed directly into the vehicle's work file so they can be sent directly to insurers
